

CASEY DEL CARPIO BARTON

APPLIED AI SYSTEMS ARCHITECT | Agent Infrastructure Engineer

Forward-Deployed AI | Evidence-bound execution for ambitious systems and high-consequence decisions.

Honolulu, Hawaii

808-936-5654

EXECUTIVE SIGNAL

Builds the operating layer between model capability and dependable outcomes: explicit authority, bounded tool use, deterministic evidence, controlled failure, continuity, and completion receipts. Combines software architecture with scientific measurement, compressed-gas safety, building-system inspection, and owner-operated field execution.

PROFESSIONAL EXPERIENCE

GlacierEQ | Founder / Applied AI Systems Builder

Jan 2025-Present

Honolulu, Hawaii

- Design and implement evidence-bound systems spanning agent orchestration, application intelligence, document and evidence pipelines, memory and continuity, infrastructure governance, and human-machine interfaces.
- Convert ambiguous architecture into typed contracts, runnable slices, deterministic tests, explicit refusal behavior, machine-readable facts, and reviewable completion receipts.
- Built a public Portfolio Receipt Router that replaced unsupported autonomous-control semantics with a local fail-closed evidence system; 69 of 69 tests passed through direct and reusable CI with zero external actions.
- Govern a multi-repository portfolio by separating source presence, review, execution, deployment, authority, and verified completion so recruiter, technical, and machine views cannot drift.

Diamond Head Home Inspections | Certified Home Inspector

2020-2024

Honolulu, Hawaii

- Inspected residential structural, roofing, electrical, plumbing, HVAC, moisture, and safety conditions; translated field evidence into clear, decision-ready reports under time constraints.
- Developed disciplined habits around uncertainty labeling, defect prioritization, interacting-system analysis, client communication, and avoiding unsupported conclusions.

Hi-Class Home Services / Hi Class Maintenance Oahu LLC | Owner-Operator, Building Systems & Field Services

2017-Present

Honolulu, Hawaii

- Scope residential repair and service work, prepare estimates, coordinate execution, and communicate assumptions, constraints, and completion status with clients.
- Work across practical building-system problems including minor carpentry, plumbing, electrical fixture replacement, drywall, painting, flooring, and maintenance planning.

CORE CAPABILITY MATRIX

Agent infrastructure & governance

Multi-agent coordination; MCP and tool contracts; capability/authority separation; approval models; state machines; bounded retries; recovery and closure.

Application & document intelligence

Role research; evidence-qualified resume generation; document extraction; structured artifacts; human and machine presentation layers.

Evidence & release engineering

Provenance; claim-to-source mapping; deterministic testing; JSON Schema; CI/CD; static analysis; integrity hashing; machine-readable receipts.

Primary technology

Python; TypeScript; JavaScript; SQL; Bash; Node.js; React; Next.js; FastAPI; REST; JSON-RPC 2.0; MCP; GitHub Actions; Docker; Vercel.

SELECTED SYSTEMS AND EVIDENCE STATES

Portfolio Receipt Router TEST VERIFIED Compatibility-safe architecture repair and evidence routing.	EVIDENCE 69/69 tests; direct and reusable CI; artifact 8910423397; zero external actions. BOUNDARY Independent technical exhibit; no datacenter control, company affiliation, or production-operation claim.
Job Application Helix RECORDED 148/148 Evidence-governed hiring and portfolio orchestration.	EVIDENCE 148/148 recorded repository tests. BOUNDARY Release-specific current-SHA and deployment gates remain separate.
Agent Coordinator RECORDED 62/62 Deterministic task ownership, dependencies, capacity, priority, and shared budgets.	EVIDENCE 62/62 recorded Python tests. BOUNDARY Hosted matrix and build-wheel promotion remain open.
Microcode Governance REVIEWED - EXECUTION BLOCKED Firmware manifests, drift, SBOMs, provenance, compatibility policy, and approval-gated rollout planning.	EVIDENCE 132-check generated contract; static review found no critical defect. BOUNDARY Private CI did not execute; not test verified and performs no firmware mutation.
PSYSOC-X BOUNDED TEST SCOPE Audience calibration across recruiter, master, machine, and relationship views.	EVIDENCE Deterministic profile and invariant cases. BOUNDARY No diagnosis, covert persuasion, or manipulation capability is claimed.

CROSS-DOMAIN SYSTEMS FOUNDATION

Scientific measurement	University of Hawaii sea-urchin morphometric research, 2016-2017: processed physical measurements of gill structures to support visual species identification.
Compressed-gas systems	Scuba Tank Technician, Hawaiian Diving Adventures and UH Dive Office, 2016-2017: tank filling, transport, inspection and repair support, and gas mixing under safety-critical procedures.
Field systems operations	Residential inspection and repair work developed practical judgment around interacting systems, failure consequences, uncertainty, and clear client communication.
Earlier leadership	Civil Air Patrol Cadet Commander and Search-and-Rescue Ground Team Leader, 2007-2011; included as historical leadership context, not as formal professional management experience.

EDUCATION AND EARLIER TECHNICAL CREDENTIALS

University of Hawaii at Manoa	B.S., Marine Biology - 2016
AWS Cloud Institute	Cloud Application Developer program - 2025-2026, in progress

Earlier technical certifications recorded in prior resumes: PSI Visual Cylinder Inspector, Eddy Current Technician, Valve Repair Technician, Oxygen Cleaning Cylinder Technician; NAUI Rescue and Master Diver; PADI Enriched Air Diver. Current status is not represented as active without updated documentation.

EVIDENCE BOUNDARY Independent GlacierEQ work and bounded technical exhibits. Test counts refer only to their stated repository and scope. No company affiliation, proprietary access, production use, customer impact, formal people-management experience, current certification status, or hardware validation is claimed without direct evidence.
